RE: GPS Mapping Data: Crandon Mine Project: 94-01298-IP-DLB

Dear Ms. Hauger:

This letter is to confirm for you that the field work regarding the elevation verification/GPS mapping, conducted by the U.S. Environmental Protection Agency during the week of November 2, 1998, has been completed. Tim Drexler, Brian Cooper and Steve Roy (all from EPA) were joined in the field by Jon Ahlness from your office, as well as by representatives from Foth & VanDyke, the Nicolet Minerals Company and the Menominee Tribe, and by John Coleman (GLIFWC) and Chris Carlson (WDNR). Steve Roy has already forwarded the data derived from the field work (without report) to a number of parties that have requested it, including Steve Donahue (Foth & VanDyke), John Coleman, Chris Carlson and you. A report summarizing the field work and data should be available after the holidays. If any other parties wish to receive this data, they may contact me at the below number or may be forwarded a copy of the data from one of the parties mentioned above.

If you have any questions regarding this work, please give me a call at 312-886-7252.

Sincerely,

Daniel J. Cozza, Crandon Mine Project Manager  
U.S. Environmental Protection Agency
